

D-HE 29 : REFRESH ELECTRICAL ACCREDITATION FOR NOT ELECTRICIAN IN LOW VOLTAGE BE/HE Maneuvers

PREREQUISITES :

- ❖ Training to H0-B0 level required
- ❖ Have already completed an initial electrical qualification at the same level

RELEVANT FOR :

Non-electrical personnel :

- ❖ Performing non-electrical work near electrical installations
- ❖ Carrying out operating maneuvers to order

OBJECTIVES :

- ❖ know how to carry out operating maneuvers safely
- ❖ Follow instructions and documents
- ❖ Know how to use protective equipment and materials and know their limits of use

TRAINEES PER SESSION :

- ❖ Adaptable to customer requirements
- ❖ Maximum of 6 participants per session to guarantee the pedagogical quality of the training

DURATION :

- ❖ 1.5 days
- ❖ 7 hours theory / 4 hours practice

PROGRAM :

- ✈ Presentation and development of electricity regulations
- ✈ The dangers of electricity
- ✈ Electrical risk zones
- ✈ Clearance levels
- ✈ Applicable documents
- ✈ Means of protection
- ✈ Use of safety equipment and tools
- ✈ What to do in the event of an electrical accident or fire
- ✈ Switching equipment on or off, including resetting a protective relay
- ✈ Connect or disconnect removable equipment specially designed to be connected or disconnected without risk

TEACHING FACILITIES :

- ✈ Expert trainers in the field of electricity
- ✈ Theoretical training rooms
- ✈ Pedagogical support in accordance with NFC 18-150 standards
- ✈ Workshop for practical exercises
- ✈ Use of specific PPE and Collective Protective equipment

TRAINING EVALUATION AND VALIDATION :

- ✈ Practical evaluation
- ✈ Theoretical evaluation via Android tablet

DOCUMENTS ISSUED :

- ✈ Declaration of electrical accreditation
- ✈ Training support

LOCATION :

- ✈ Inter-company training : Salies-du-Salat (31) or Toulouse (31)
- ✈ Intra-company training (in your facilities)
- ✈ Online
